

Virocane

Virobuild collaborates with Indonesian Institute of Architects to build freestanding structure on Senggigi Beach in Lombok for Bamboo Festival.

Lombok hosted the International Festival of Bamboo Architecture. Organized by Indonesian Institute of Architects and Budi Pradono. 50 architectural works using bamboo as the main material, were displayed. The best installations were judged by a team of curators; Budi Pradono, IAI Jay Subiakto, Asmudjo Jono Irianto, Dipl.Ing. and Christoph Tönges. The Festival theme "Re-Design the World with Bamboo" aim, was to develop the creative economy on Lombok Island by utilizing local materials and increasing the value of keeping a "sustainable environment" said Chairman of the Indonesian Institute of Architects - West Nusa Tenggara Rahman Wibisono. Participants were from various backgrounds, including professionals and student architects, landscape architecture, contractors and developers.

Virobuild, the environmentally conscious manufacturer of Virocane, contributed fibers, cane and skilled hands for one of the designed beach structures.

The Virocane structure was designed by Ketut Rana Wiarcha, Chairman of the Indonesian Institute of Architects in Bali, and built with Ketuts direction by Adhi Susanto, Maury Janwarin, (V2- Bali Virobuild Showroom Manager and Aryo (our distributor in Lombok).

Virocane and its unlimited uses was introduced to the architecture and design community at this event.

Virocane, like all Viro products is 100% recyclable, all-weather and non-toxic. Its made of HDPE, a earth friendly material unlike PVC. For more information about Viro products, visit www.virobuild.com.
